AN UNPRECEDENTED 12 awards including the Masters Builders Association of Victoria 'Regional Residential Builder of the Year' and the Housing Industry Authority 'Regional Home of the Year' have re-confirmed Malishev Homes as the state's leading designer and builder of premium quality homes, no matter what the price bracket.

The Geelong-based company triumphed at two recent awards nights through Malishev Homes, which focuses on premium quality custom built homes, and its subsidiary Q Designer Homes, which concentrates on building quality homes at an affordable price.

"We are extremely proud of all these results," said Managing Director Russell Malishev.

"It's an honour to be recognised by two highly respected, independent bodies like HIA and MBA.

It's equally satisfying to know that we have been providing our customers with what our industry acknowledges as products of the very highest quality.

"Consistency is the key to any business success and we have worked to build on our reputation over a long period of time through the provision of outstanding customer service and creating homes of outstanding quality.

"We know that this success is no fluke. It has only come about as the result of our commitment to creating unique, quality designs that not only inspire but stand the test of time."

"Masterpiece of individual architecture and quality design" helps seal unprecedented 12 awards

Housing Industry of Australia judges described the Malishev Homes entrant, awarded Regional Home of the Year, as a "masterpiece of individual architecture and quality design".

"The elaborate finishes and decorative features are one of a kind and were unlikely to be surpassed on quality craftsmanship," the judges continued. "It's a testament to the outstanding skills applied and repeated on all Malishev Homes."

Russell Malishev said those comments reflected positively on all the staff at Malishev Homes.

"We're a team at Malishev and I am immensely proud of all our staff."

"It's wonderful just to be part of a group that strives for perfection in every aspect of the design and construction phase," he said. "To be recognised by our peers in this way vindicates all the time and effort we put into producing outstanding products for all our customers."
